

You are invited to a joint presentation on ***modern low rise concrete volute pumps*** as a possible solution for the 17th Street, Orleans and London Avenue outflow canals.

Guest Speakers: Shawn Stevenson, P.E.
Vice President, KSB-USA, Inc.
and design experts from Holland and Germany.

KSB, Inc., is an international manufacturer of advanced pumping systems, including the Bevron concrete volute pump, a pump technology successfully used in Holland, the U.K., Germany and other countries for over 25 years, with related technologies in use in the United States.

Discussion Topics: The benefits of this technology to our community including the technological, safety, environmental and aesthetic advantages of ***modern concrete volute pumps.***

Date: Tuesday, September 9, 2008

Location: **St. Dominic's Gymnasium**, 6300 block of Vicksburg Street
behind the Church on Harrison Avenue

Time: Doors open at 6:30 p.m.

Refreshments will be served.

Hosted by: Lakeview Civic Improvement Association
and Participating Civic Associations:

Broadmoor Improvement Association
Lake Oaks Neighborhood Association
Bucktown Civic Association
Lake Terrace Property Owners Association
Dillard Community Development Corporation
Lake Vista Property Owners Association
Oak Park Neighborhood Association
Gentilly Heights East Neighborhood Association
East and West Lakeshore Property Owners Association
MidCity Neighborhood Organization
Lower Gentilly Neighborhood Association

Our associations and our residents want the best and safest pumps to be used in the planned new pumping stations and want to be certain all alternatives are considered.

We have also invited members of the New Orleans City Council and Jefferson Parish Council, State Senators and Representatives, members of our congressional delegation, the Army Corps of Engineers, the Sewerage & Water Board and the media.

We expect a large turnout and hope you will join us.

Al Petrie, President
Lakeview Civic Improvement Association
